AUTOMOTIVE RELAY

Typical Applications

Rear window defogger, Battery disconnection, Air-conditioning, ABS, Heating control, Fog lamp & headlight control, Cooling fan control, Fuel pump control, Traction control system, Power distribution

Features

- 70A switching capability
- Extended temperature range up to 125°C
- 1 Form A contact arrangement
- Sealed IP67 and dust cover types available
- With transient suppression resistor
- Contact gap: 0.6mm
- RoHS & ELV compliant (555)

CHARACTERISTICS

Contact arrangement	1A					
Voltage drop (initial) 1)	Typ.: 20mV (at 10A)					
voltage drop (initial)	Max.: 30mV (at 10A)					
Max. switching voltage	50VDC ²⁾					
Max. switching current	70A ²⁾					
Max. continuous current	70A (at 23°C) 50A (at 125°C)					
Min. contact load	1A 6VD					
Electrical life	1×10 ⁵ OPS					
Mechanical life	1 x 10 ⁷ ops 300ops/min					
Initial insulation resistance	500MΩ (at 500VDC					
Dialoctric atropath	500VAC (1min, leakage					
Dielectric strength	current less than 1mA)					
On and a firm	Typ.: 6ms					
Operate time	Max.: 10ms (at nomi. vol.)					

Typ.: 4ms						
Max.: 7ms ³⁾						
-40°C to +125°C						
-40°C to +155						
10Hz to 500Hz 176 m/s ² (18g)						
294 m/s ² (30						
QC						
Sealed IP67 & Dust cover						
Approx. 38g						
cover retention (pull & push): 245N						
terminal retention (pull & push): 100N						
terminal resistance to bending						
(front & side): 10N						

- 1) Equivalent to the max. initial contact resistance is $50 m\Omega$ (at 1A 24VDC).
- 2) See " Load limit curve ".
- The value is measured when voltage drops suddenly from nominal voltage to 0 VDC and coil is not paralleled with suppression circuit.

ISO9001、ISO/TS16949、ISO14001、OHSAS18001 CERTIFIED

- 1) Corresponds to the peak inrush current on initial actuation (motor).
- 2) The load in the table excludes flasher. When applied in flasher, a special silver alloy (AgSnO2) contact material should be used and the ordering key should be 170 as a special suffix. Please heed the anode and cathode's request when wired, terminal 30 should connect with anode.
- 3) The load wiring diagrams are listed below:

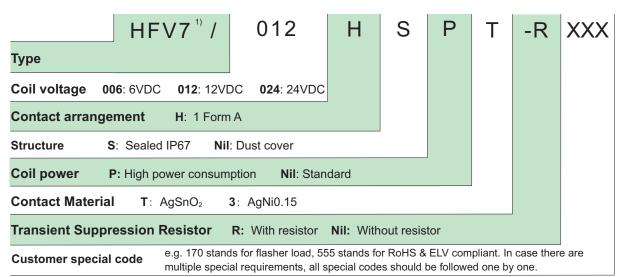

4) When the load requirement is different from content of the table above, please contact Hongfa for relay application support.

	24	14.4	2.4	288	2700	260.2	2.2	36	28

- 1) The power consumption of parallel resistance is 0.5W.
- 2) Max. allowable overdrive voltage is stated with no load applied.

ORDERING INFORMATION

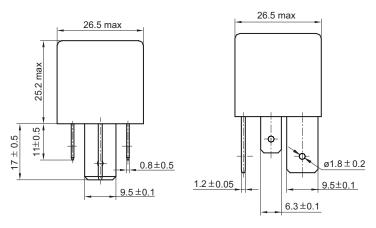

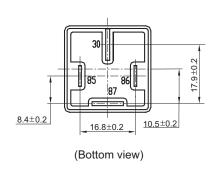

1) HFV7 is an environmental friendly product, please mark special code (555) when order.

OUTLINE DIMENSIONS, WIRING DIAGRAM AND PC BOARD LAYOUT

Unit: mm

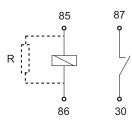

Outline Dimensions

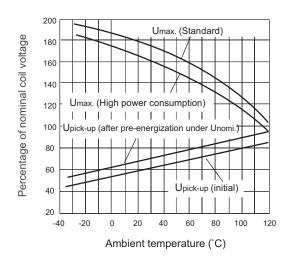

Remark: Terminal vertical deviation tolerance is 0.2mm.

Wiring Diagram

CHARACTERISTIC CURVES

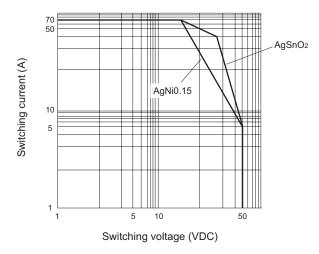

1. Coil operating voltage range

- 1) The curve is applicable under the condition of no contact load applied.
- The operating voltage is connected with coil energized time and voltage. After energized, the operating voltage will increase.
- 3) The maximum allowable coil temperature is 180°C. For the coil temperature rise which is measured by resistance is average value, we recommend the coil temperature should be below 170°C under the different application ambient, different coil voltage and different load etc.
- 4) If the actual operating coil voltage is out of the specified range, please contact Hongfa for further details.

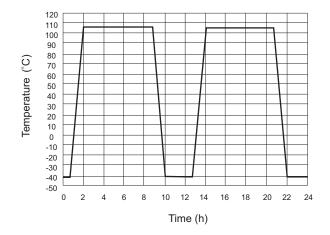

CHARACTERISTIC CURVES

2. Load limit curve

- 1) The contact load is resistive.
- 2) The load and electrical life tests are made according to "CONTACT DATA" parameters' table. If actual load voltage, current, or operate frequency is different from "CONTACT DATA" table, please arrange corresponding tests for confirmation.

3. Ambient temperature curve of the electrical life test

- 1) The minimum temperature is -40°C.
- 2) The maximum temperature is 105°C.

Disclaimer

This datasheet is for the customers' reference. All the specifications are subject to change without notice.

We could not evaluate all the performance and all the parameters for every possible application. Thus the user should be in a right position to choose the suitable product for their own application. If there is any query, please contact Hongfa for the technical service. However, it is the user's responsibility to determine which product should be used only.
